Appointment Confirmation PET/CT Scan

Dear Patient,

Your appointment for, ... a.m. / ... p.m., for a PET/CT scan is confirmed as soon as we receive this completed and signed form from you. On receipt we will proceed to order the required radioactive substance (costing ca. € 370.00 for fluorodeoxyglucose, or € 900.00 if choline or tyrosine are required).

Cancellation

Please note that holding the machinery and substances in readiness for your appointment incurs high running costs, further, that the radioactive substance needed for the investigation has to be ordered by us 24 hours (one week in case of choline and tyrosine) before your appointment and decays rapidly. Therefore please attend appointments on time.

Should you be unable to attend your appointment, we require written cancellation (fax or e-mail – details see above) 48 hours before the appointment. If the appointment is cancelled less than 24 hours before the agreed time (or if you do not attend and do not cancel as set out above), there is a cancellation charge of € 300.00 plus the cost for the radionuclides (ca. € 370.00 / €900.00), all of which is payable to us by you within three weeks at the latest.

Should your appointment not be able to proceed due to a failure of our machinery, we will offer you the earliest possible alternative appointment.

In the event that you incur unnecessary travel costs due to such a failure on our part, we ask you to provide us with the originals of your booking details showing the associated costs. On that basis we offer to subtract that sum up to a limit of EUR 600 from the cost of the scan/examination when we undertake the examination at the alternative date.

Medical files to bring to your appointment (as applicable)

- referral note from your oncologist
- discharge letter from your hospital
- final report of the radiation therapy to date
- report of the operation
- pathology report
- any pertinent preceding imaging examination (scans & reports)
- allergy details
- documentation of medicine pumps (or similar)
- a list of all medication currently taken by you
- up-to-date blood levels: basal TSH (thyroid stimulating hormone), Quick/INR, creatinine

Bankverbindung: Bensberger Bank BLZ 370 621 24
Konto Inh. Dr. J. Müller-Hübenthal Kto. Nr. 969 00 18

What you receive from us

- Patients receive the images (film prints, glossy paper prints and/or DICOM CD/DVD incl. viewer) immediately following the examination, to take home with them.
- The written report is complete in German within two working days.
- The English translation of the full report is available within seven working days.
- Invoice - all charges are based on the GOÄ (scale of charges and fees for medical doctors in Germany), which are generally refundable within EU countries.

Payment

Payment must be made in full, either by cheque, usual credit/debit cards (Master, Visa, **not** American Express) or cash (€ only) immediately following the appointment.
